

## The QuicSend Partnership

Contract for \_\_\_\_\_

As of \_\_\_\_\_ to \_\_\_\_\_

At QuicSend we like to keep things short, sweet and simple. We won't use complicated legal vocabulary or repetitive jargon to get our points and rights across, but instead we will treat you like a business partner. We have some basic rules before we get started with generating an ROI based platform for your business.

Firstly, this is a **FULL** membership which grants you access to all our features and benefits for a onetime payment of \$90. You are welcome to cancel the process at any time and will not be charged a cancellation fee. We will aim to improve the process in any areas you feel is lacking before confirming your decision. There are also no refunds available.

Your business links will get promoted **consistently** every day for 30 days to professionals all over the world. This service is our most basic as we do not focus on target market or ROI but instead link small businesses to professionals as a form of daily advertisement for a reasonable price.

This process has a 75% success rate for increasing web traffic, potential leads and sales.

**In saying that please keep in mind**, the ROI process is long term and can take anywhere from 1.5-2 years to come into fruition. The algorithm can however be configured in the space of 4-6 months so we can get the platform going and guide you on how to advertise, attract leads and create relationships.

We expect our customers to be just as driven as us to achieve the 'sky is the limit' results. This is why we charge the rate we do and why we spend so much time revamping your current pitch and social media algorithm stats, results and much more. **As we are focused on generating more ROI**, our sole focus lies in configuring a new algorithm, refining your pitch, giving you access to our growth hack method and helping you to achieve an advertising platform connecting thousands of users to your business daily. We do not hold sole responsibility of **100% of your total sales**.

As part of being a QuicSend partner, we will hold a mutual understanding and trust of not sending or disclosing our growth hack methods and marketing strategies to friends or family who are **not** direct customers of QuicSend either for your benefit or benefits to their business or income growth.

In doing so may result in a penalty and immediate disqualification of your membership with QuicSend.

**Please** remember to treat everyone with utmost professionalism, respect and to approach new online connections and customers only with the approved growth hack methods as directed by QuicSend. **Do not** spam or use pushy sales tactics as this is not what QuicSend is about nor stands for at any point in time. If you need help, do not hesitate to call us as this is a part of the feature of a full membership.

However, please keep calls to a timeframe of a minimum of 15 minutes if it is not urgent or 1 hour if it is an urgent query. All calls will only be taken during standard business hours NZD time. This is from 9am-5pm on weekdays.

**This is optional**, as the growth hack method works with or without a premium account but for better retention and extensive growth of your brand it is recommended to sign up to premium. We will also need your permission to access your account to get the first few interactions started so you can witness the process first hand and also to help boost your confidence as you take the process further.

Lastly, we look forward to working with you and seeing your business grow and thrive using QuicSend's techniques. We will always work tirelessly to ensure your business can generate ROI by reaching thousands in the span of a few months. This is how our business started and we have now reached over 3000 members within our target market in our platform based around our business idea.

**I'm driven, I'm motivated, I'm ready to succeed and I'm ready to start ...**
